### DETAILED ACTION

1. In view of the Appeal Brief filed on 3/12/04, PROSECUTION IS HEREBY REOPENED. A new rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maguire 2,482,589 in view of Pfister 2,710,571 and Lintz 5,687,556.

Maguire discloses a hand held gardening implement having a frame which comprises the rake handle 18 and center portion 10a of the holder, rake head having working elements (tines) capable of piercing the ground at the proximal end of the frame, a brace 10c (Figure 3) attached

Art Unit: 3671

to the center portion 10a of the frame at the distal end, a handle 11 intermediate the working element and projecting away from the frame 18, 10a in the opposite direction as the working element, and the brace 10c is formed of a circular metallic rod stock.

However, a cushion for contacting the forearm on the brace and the handle being resilient.

Pfister discloses a cushion 20 to the degree as claimed on a brace portion of a hand tool. Pfister discusses that the having a brace with a cushion avoids discomfort for the operator (Column 2, lines 35-51).

Lintz discloses providing a cushion (50) on the handle of a rake having a brace. The cushion enhances the user's comfort (Column 4, lines 33-42).

It would have been obvious choice in design to provide a cushion on the brace as seen in Pfister to the brace in Maguire to provide a comfortable rest for the forearm and a cushion as in Lintz on the handle of Maguire to enhance user comfort. To provide such a cushion to offer comfort and ease of operation, especially when the tool is being used for an extended period of time or handling a burdensome load would be obvious.

Regarding claim 16, the metal tine rakes with a substantially rectangular head (not the fanned-types used in raking leaves) can be used for digging. Hoes can also be used with implement holder (Column 3, lines 24-32).

#### ***Response to Arguments***

4. Applicant's arguments with respect to claims 14-16 have been considered but are moot in view of the new ground of rejection.

Art Unit: 3671

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Pfister teaches that adding a pad avoids discomfort to the user (Column 2, lines 35-51). .
